Our Platform

Source Defense is a pioneer and innovator of technologies that leverage machine learning, industry regulations and best practices to extend website security to the client itself, the web browser. With the Source Defense platform, you never have to choose between innovating and protecting what matters most, your customers & their data.

Source Defense is the market leader in Client-side Security for websites, providing real-time threat detection, protection and prevention of vulnerabilities originating in JavaScript. The Source Defense patented Website Client-side Security Platform offers the most comprehensive & complete solution addressing threats and risks coming from the increased usage of JavaScript, libraries and open source in websites today.

The ADMIN management console, VICE sandboxing and WiPP data shield offerings utilize patented technology and are deployed by leading Fortune500 enterprises in the Financial, Retail, and Healthcare markets. Headquartered in Israel, with branches across the US and a strong community of global valuable partnerships, Source Defense is the most innovative, reliable and trusted partner in the fight against client-side attacks.
